“Automating Server Application Migrations – goodbye Server 2003 and Server 2008”

Ezysnap Server delivers low risk, cost effective automated server application migrations from any Microsoft Server (MS2000, MS2003, MS2008 or MS2012). These application workloads can then be provisioned to the same or a new Microsoft Server platform version in any environment on-premise, hosted or the cloud.

Ezysnap Server is a recently commercialised software tool with an optional service. This IP and product has been developed over 10 years and in excess of 7000 desktop and server application migrations.

Proven technology - already being used by a top 10 Australian Corporate

Key features:

- Automatic application capture.
 - Separates application layer from operating system in minutes
 - Zero application owner / client requirement
 - Captures all applications at once
 - Reduces project timeframes
- Lowers migration risks
 - No agents, clients or software
 - No Production Server change control required
 - Captures exact configuration and patch state of all applications
 - Enables full visibility, control and granular editing on the way through
- Reduces migration time and costs by automating simple and complex tasks
 - Customisable automation
 - Convert Operating System file system. Example Server 2003 to Server 2012
 - Convert 32Bit application layer to 64Bit installable application layer
 - Complete control and flexibility
- Highly effective as it separates server applications from the underlying operating system.
Optional service:
 - Application readiness assessment
 - Further separation of application layer into individual applications
 - Convert applications to production MSI managed applications
 - Convert applications to Microsoft App-V or any other virtual software format.
- Proven to quickly resolve time consuming and complex tasks
 - Hosted Citrix application migrations
 - .net migrations
 - Automation and integration with Microsoft IIS migration
 - Solves the problem when installed application source and configuration files no longer exist.
- Comprehensive suite of migration tools
 - Enables analysis, reporting and remediation for 64Bit, Server 2012 R2
 - Enables and performs conflict management
 - Software Inventory
 - IIS Web Deploy integration

	Service Provider (Manual)	AppZero	ZInstall	Zaptz Ezysnap
Zero client interaction required	✗	?	✓	✓
Capture and install fast and simple	✗	✗	✓	✓
Does NOT require Application Installation Source	✗	✓	✓	✓
Zero Production Server Change Control	✓	✗	✗	✓
No capture install agents, clients or software	✓	✗	✗	✓
Fixed Price fixed outcome	?	?	✓	✓
